### **Maryland man indicted for alleged support of al Shabaab: Justice Department**

(Reuters) A Maryland man has been indicted on accusations of supporting the Somalia-based Islamic militant group al Shabaab and appearing in videos for the group, the U.S. Justice Department said on Monday. Maalik Alim Jones, 31, "was charged with providing material support to al Shabaab and receiving training from the terrorist organization," Assistant Attorney General for National Security John Carlin said in a statement released by the department. Prosecutors said the suspect traveled to Somalia, received military training from al Shabaab, and took up arms as a terrorist fighter with an organization that has declared the United States a target. "Having allegedly sworn allegiance to al Shabaab, a terrorist organization bent on destroying America, Maalik Jones will now face American justice in a Manhattan federal court," Manhattan U.S. Attorney Preet Bharara said in a statement. A lawyer for Jones was not listed in online court documents. Jones has appeared with other al Shabaab fighters in at least two videos that were recovered from an al Shabaab fighter, prosecutors said. In one, he possessed a firearm, and is seen with several al Shabaab fighters who participated in a June 2015 attack on a Kenyan Defense Force base where two Kenyan soldiers were killed, they said in a statement. The case comes just days after two men from the Middle East who came to the United States as refugees were arrested on federal terrorism charges in California and Texas last week for supporting Islamic militant groups. There have been more than 75 publicized arrests of U.S. residents who have allegedly become radicalized by Muslim militants since 2014.

## **International News – Significant Events**

### **Istanbul's Sultanahmet Square Hit by Blast, Casualties Reported**

(NBC) An explosion in a popular Istanbul tourist zone killed one person and wounded several others on Tuesday, Turkish police told NBC News. The blast hit in the central Sultanahmet district. Images and video posted on social media showed ambulances racing to the scene and security officials patrolling the area. Turkish police told NBC there was at least one fatality, though images from the scene showed what appeared to be more bodies. The cause of the explosion was not immediately clear, though Turkey has been grappling with the threat of ISIS-linked extremists. A double suicide bombing blamed on ISIS killed more than 100 people in Ankara in October, and Turkey has since stepped up its efforts to tackle the militants. Turkish officials in December said they had detained two suspected ISIS militants and foiled a plot to bomb the New Year's Eve celebrations in its capital, Ankara.

# **SITUATION SUMMARY**

## **Cal OES Southern Region Storm, 2016-01-05 Winter Storm**

- The Southern Region Emergency Operations Center (SREOC) is activated to Level I and continues to coordinate the regional response in support of 2016-01-05 Winter Storm.
- A Regional Event has been created in Cal EOC: 2016-01-05 Winter Storm

## **Critical Concerns**

### **San Diego County**

- Dehesa School District in San Diego County, closed all of its schools for two days (01/11/16 – 01/12/16) for cleanup of storm damage.

### **San Bernardino County, Power outage, Southern California Edison (SCE)**

- Telephone landline service in Angeles Oaks is expected to be restored by 01/12/16.
- There are no requests for state assistance or unmet needs at this time.

### **American Red Cross**

- Shelter and shelter support teams will remain on standby in the Yucaipa area through 01/12/16

## **SPILL 16-0206, Sewage, City of San Diego, San Diego County**

- On 01/10/16 at 1711 hours the California State Warning Center received notification of a sewage release from the City of San Diego, Public Utilities. Rain caused the integrity of a hillside to fail causing the rupture of a 15 inch sewer main resulting in an 84,000 gallon spill.
  - Fiesta Island Beach and Tecolote Playground Beach have been closed due to contamination from the spill.
  - As of 01/11/2016 an estimated 108,000 gallons of sewage was released.
  - The County Department of Environmental Health has posted signs warning the public of sewage contamination at various points along the beaches, which stretch from the Fiesta Island land bridge north to the visitor's center at Clairemont Drive.

# **SITUATION SUMMARY**

## **Cal EOC Incident – 2014 Drought**

- SOC / Inland REOC remains activated in support of 2014 Drought

## **Weather of Concern**

### **Northern California**

- An approaching low pressure storm system will bring periods of heavy rain and gusty winds to northwest California beginning this morning and continuing into Wednesday.
  - Widespread rainfall amounts of 1 to 3 inches will be possible, with local amounts around 4 inches over the higher terrain.
  - The heavy rain may lead to urban and small stream flooding.
  - Southerly winds will gradually increase on today to 15 to 30 mph with gusts to 45 mph across coastal headlands.
  - Wind gusts up to 60 mph will be possible over the ridges.
- The next winter storm will arrive early Wednesday morning, lasting into the evening, with snow impacts to the Sierra.
  - The heaviest snows in the Sierra are likely from Highway 50 northward, with less of an impact to Mono County than storms the previous week.
  - Gusty south to southwest winds will accompany the storm - 25-35 mph in valleys and over 80 mph on Sierra ridges.

### **Southern California**

- High surf conditions are expected for the Central Coast through much of the coming week with the large surf persisting through Thursday.
- The largest surf will likely be near Ventura Harbor, but large surf is also expected for west facing beaches of Southern Los Angeles County such as Manhattan Beach.
- The southwest facing point breaks of the Santa Barbara South Coast will also see high surf, peaking with sets to near 8 feet today.
- The large surf could potentially cause damage to coastal structures such as piers, especially on the Central Coast. The surf may also cause beach erosion and minor coastal flooding, especially during the time of high tides.
- The highest tides of the day will be around 6 feet between 1000 to 1100 hours today.

# WEATHER

## WEATHER SYNOPSIS BY REGION:

### **NORTHERN CALIFORNIA AND CENTRAL COASTAL AREAS:**

#### **Eureka Weather:**

Mainly dry weather is expected this evening. A stronger system will begin to impact Northwest California early Tuesday and continue into Wednesday bringing periods of heavy rain and windy conditions. The wet pattern will continue into this coming weekend.

#### **Medford Weather:**

The day starts into a very active pattern that is expected to remain though most of the week. A very windy system is already at the coast this morning as the front approaches the coast late this morning winds increase to 80kt, forming a brief coastal barrier jet. Likewise inland the gradient from Redding to Medford tightens bringing strong winds in the Shasta Valley that spill into the Rogue Valley. Winds from the Southwest are going to be very strong across the entire region into tonight and over the east side into Wednesday morning nearing close to 80kt over the Cascades this afternoon then moving over the East side into Wednesday morning. This very strong warm conveyor flow will raise snow levels above 6000-7000 feet for the bulk of the event and have cancelled the Winter Storm Watch in Siskiyou County. There is a brief lull in the action with showers tapering off into Wednesday night before the next system in line moves in Thursday. This system will have lower snow levels as the flow is more westerly and this system will be windy but not as strong as today's system. Snow levels will be a good deal lower with this system and another round of brief moderate to heavy snow is possible down to the lower pass levels and the Mount Shasta area.

#### **Reno Weather:**

High pressure over Western Nevada will keep dry conditions and valley inversions in place today. The next area of low pressure will impact the Sierra and Northwest Nevada on Wednesday with increasing winds and moderate mountain snow. Additional weather systems will bring chances of rain and snow later this week and into the weekend.

#### **San Francisco Weather:**

A stronger, wetter weather system remains on track to bring widespread rainfall and gusty winds to the region beginning this evening over the North Bay and across the remainder of the region Wednesday morning. While breaks in precipitation are expected late in the week and into the weekend chances for rain appears to persist through the upcoming weekend and likely through at least next week.

# WEATHER

## WEATHER SYNOPSIS BY REGION:

### **CENTRAL CALIFORNIA AND SOUTHERN SAN JOAQUIN VALLEY:**

#### **Sacramento Weather:**

Wet pattern returns as a stronger storm is will move through Northern California tonight into Wednesday, additional weather systems are possible later in the week.

#### **Hanford Weather:**

High pressure will continue to provide dry weather and light winds to the Central California interior today after patchy dense fog this morning. A Pacific storm system will bring rain and higher elevation snow to the region Wednesday and Wednesday night with gusty winds through and below the Kern County Mountain passes.

### **SOUTHERN CALIFORNIA:**

#### **Los Angeles Weather:**

Northwest flow aloft will persist through this weekend. This pattern may produce light rain Wednesday and again on Saturday mainly North of Santa Barbara as two weak cold fronts push through the area. Otherwise fair skies with periods of light offshore winds and somewhat cool temperatures will prevail.

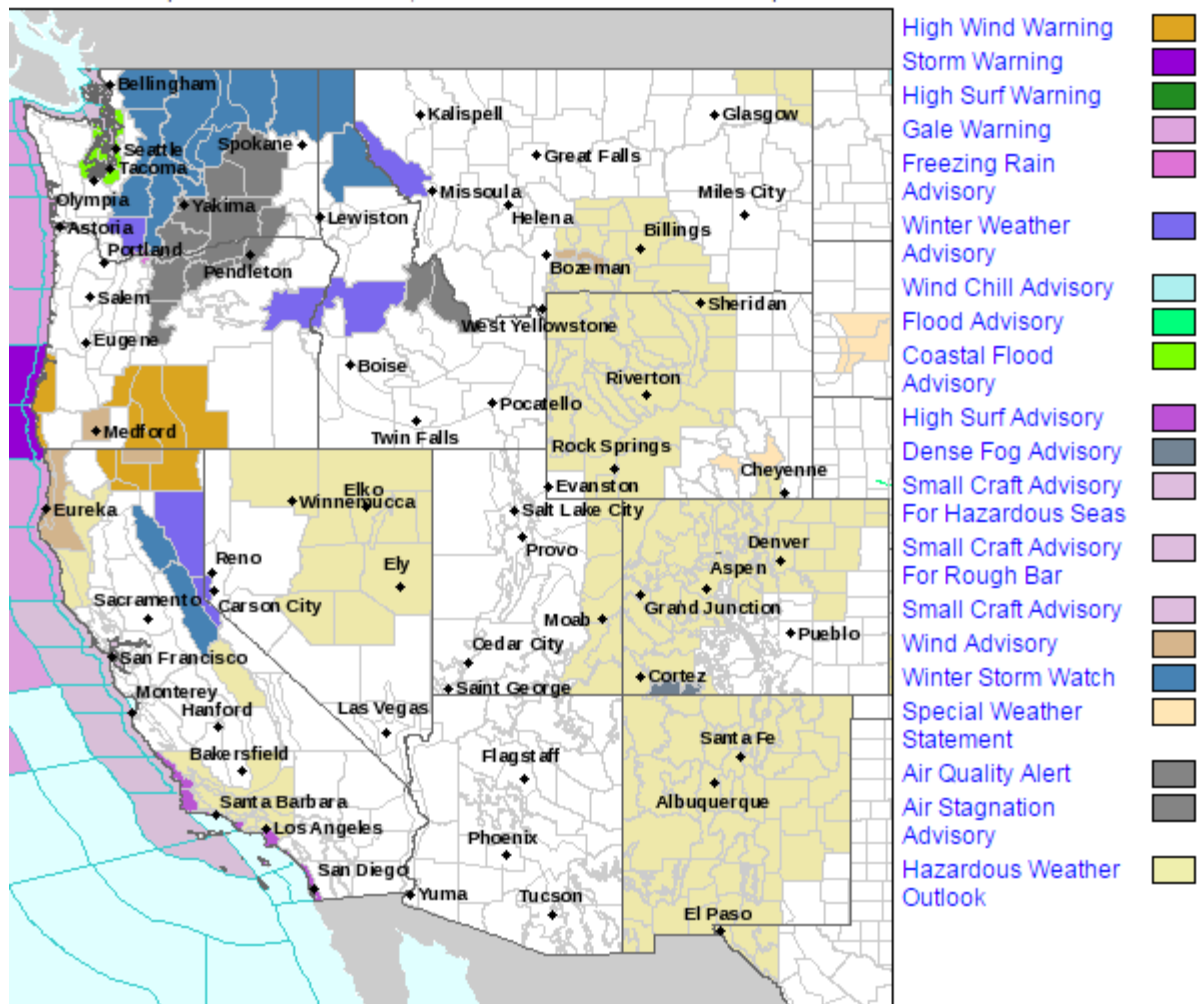

#### **Extreme Southwestern California including Orange, San Diego, Western Riverside and Southwestern San Bernardino Counties:**

High pressure aloft will bring dry weather through Tuesday. A weak trough will bring cloudy and cooler weather Wednesday with a slight chance of showers late in the day. Fair weather returns Thursday through early next week.

#### **Southeast California Weather:**

Slightly below normal temperatures and generally dry conditions are forecast across the area through the weekend. A couple weak weather systems passing through Northern Arizona will bring clouds to the region and a slight chance of showers to higher terrain locations for Friday and Sunday.

# CAL OES 2014 DROUGHT

## Cal EOC Incident – 2014 Drought

- The SOC is activated in support of the Drought State of Emergency and continue to monitor the situation.
- The Governor issued Executive Order B-26-14 on 09/19/14, to streamline relief efforts for families with drinking water shortages due to drought, specifically through the California Disaster Assistance Act, to provide temporary water supplies to households without water for drinking and/or sanitation purposes.
- The Governor issued Executive Order B-29-15 on 04/01/15 which announced actions that will save water, increase enforcement to prevent wasteful water use, streamline the state's drought response and invest in new technologies to make California more drought resilient.
- CDAA 2014 Drought Fact Sheet and Frequently Asked Questions provided to Regions for reference and distribution.
- Cal OES Recovery continues to coordinate the Community Impacts Workgroup conference calls. Currently, the calls take place on alternating Wednesdays.
- Cal OES Recovery/Individual Assistance finalized an updated 2015 version of the drought brochure of programs and services for individuals, businesses, farmers, and ranchers. It has been put on the Governor's Drought webpage. State agencies may put the following link to the brochure on their webpage <http://ca.gov/drought/pdf/Drought-Assistance-Brochure-2015.pdf>
- Cal OES Regions (Inland, Coastal, Southern) collective OA drought call is facilitated by the SOC and will be held once per month.
